Summary

Frontend Developer with 3+ years of experience specializing in building modern, scalable, and performant web applications using **React.js** and **Redux**. Proficient in developing **responsive UIs**, integrating **RESTful APIs**, and optimizing for **cross-browser performance**. Strong understanding of Agile methodologies, component-driven development, and frontend architecture. Passionate about delivering clean, maintainable code and enhancing user experience through innovative UI/UX strategies.

Skills

Languages : JavaScript (ES6+), TypeScript, HTML5, CSS3

Libraries/Frameworks : React.js, Redux, Material-UI (MUI), Tailwind CSS

Tools : Git, GitHub, Visual Studio Code, Vite

Testing : React Testing Library, Jest

Experience

SV Algo Technologies, React.js Developer

Sep 2025 - Oct 2025

- Worked as a **React.js Developer** using **TypeScript** and **Material-UI (MUI)** to build responsive and modular web interfaces.
- Collaborated with the team to design and implement **reusable React components** with strong typing and interface-based props.
- Integrated the frontend with **RESTful APIs** for dynamic data visualization and improved data accuracy.
- Applied **React Hooks**, **Context API**, and code-splitting to enhance performance and maintainability.
- Participated in Agile sprints, daily stand-ups, and peer code reviews, improving code quality and delivery efficiency.

Tata Consultancy Services, Frontend Developer

Feb 2022 - Jul 2025

- Developed and maintained **enterprise-level React applications** with Redux and REST API integrations.
- Enhanced application speed and responsiveness by **25% using lazy loading, memoization**, and dynamic imports.
- Built **reusable UI components** with Tailwind CSS, improving design consistency and maintainability.
- Integrated **Redux for global state management**, handling complex user workflows across multiple modules.
- Partnered with QA to implement **unit testing using Jest and RTL**, achieving >90% test coverage.
- Ensured **mobile responsiveness and cross-browser compatibility** across all supported platforms.
- Participated in daily stand-ups and sprint planning in Agile teams.

Projects

FlowOne | *React.js, TypeScript, MUI, Redux, REST API*

- Developed and maintained core modules for a **credit management and accounts receivable platform** aimed at streamlining customer billing and payment tracking.
- Built and optimized **React components with TypeScript and Material-UI (MUI)** for dashboards, reminders, and client data views.
- Integrated **RESTful APIs** for invoice, payment, and customer management, ensuring reliable real-time synchronization.
- Implemented global state handling using **Redux Toolkit** and reusable form components with validation.

- Collaborated with backend and product teams on ongoing development of the **inventory management module**, ensuring smooth integration with existing workflows.

CommerceHub | *JavaScript, React.js, Redux Toolkit, Tailwind CSS, React Router, REST APIs*

- Built a **scalable e-commerce frontend** with dynamic product listing, cart management, and seamless multi-step checkout flow.
- Designed a **fully responsive and accessible UI** using Tailwind CSS, improving mobile usability and cross-device consistency.
- Optimized performance using **React hooks, memoization (useMemo, useCallback), and lazy loading**, reducing unnecessary re-renders.
- Implemented **centralized state management using Redux Toolkit**, ensuring predictable state updates and efficient data flow.
- Developed reusable **custom hooks** for API handling, form validation, and business logic abstraction to improve code maintainability.
- Integrated secure **authentication and protected routes** with token-based session handling.
- Consumed and managed **REST APIs with proper error handling, loading states, and caching strategies**.
- Integrated **React Query** for efficient server-state management, caching, and background data synchronization.
- Improved UX with **conditional rendering, skeleton loaders, and smooth navigation** using React Router.

FinBank | *Javascript, React JS, Redux, Material UI, React Router*

- Built responsive banking dashboard supporting transactions, budgeting, and account summaries.
- Used Tailwind for layout and UI, React for interactive components.
- Implemented lazy loading with Suspense and custom hooks to enhance user experience and performance.
- Integrated Redux and REST APIs to maintain data consistency and secure user sessions.
- Created **custom React hooks** for form handling and input validation.

Education

QIS College of Engineering and Technology, Ongole

2016 - 2020

- Bachelor of Technology in Electronics and Communication Engineering
